Light : Ensure a good dose of indirect sunlight. Ideally the early morning light is advisable.

Temperature : Warm growing orchids with temperature between 25°C to 38°C suitable for growth. During fall, limited exposure to lower night time temperatures encourage growth of spikes. Higher temperature will encourage faster growth.

Humidity : Maintain humidity level of 60% - 80%. Regular watering in plants helps maintain the humidity and encourage growth. Good air circulation is a must.

Fertilizer : Weekly fertilizing required during active growth. In winter months, plants are fertilized twice a month.
